What my team thinks of me

" I see Saguna as the heartbeat of the Learning team! "

" Her work rate and number of tickets is really strong and it's noticeable when she's off that we get through less work "

" She's not only a good developer who is great at getting through our FE work, but she plays a really important role to the morale of the team too "

" She's so friendly and positive - it really helps"

" Good communicator "

"Receptive to feedback (e.g. in code reviews) "

" Saguna is very empathetic and always cares for others in the team. She is an excellent team player "

Objective

I'm a dedicated, collaborative, hard working team player looking for a challenging Front-end web developer role.

Experience

Oct 2018 - present

Front end Developer @ British Medical Journal

I have extensive experience building React sites, Flutter mobile apps, and HTML websites. My responsibilities have included conducting peer code reviews, deploying sites using AWS, GitHub Actions, and Jenkins, and writing Jest and Cypress tests. I have contributed to BMJ Learning, BMJ OnExamination, Best Practice, and The BMJ. My work has required me to transition between agile teams, participate in stand-ups, and utilize a range of tools such as Gulp, Grunt, SASS, LESS, Javascript, Dart, and React. Multitasking and meeting tight deadlines are second nature to me, and working under pressure has honed my ability to learn and adapt quickly.

Oct 2011 - Nov 2017

Front-end Developer @ Bwin.Party Gaming

I have managed the maintenance and development of over 32 bingo sites, including prominent brands such as Foxy Bingo, Cheeky Bingo, and Mirror Bingo. My experience includes migrating more than 10 websites into Adobe CQ5 CMS. I am capable of independently handling projects with minimal supervision, effectively managing my workload, prioritizing tasks, and engaging with clients. I am skilled at liaising with both technical and non-technical stakeholders and am known for consistently meeting deadlines.

My work involves translating PSD wireframes into mobile-responsive sites and landing pages, and I have extensive experience working in an Agile Scrum environment. Additionally, I have coordinated with localization teams to deliver multilingual sites.

May - Oct 2011

Front-end Developer @ Concep

Sole front-end developer responsible for coding corporate websites, microsites in Umbraco from PSD designs. Successfully managing multiple projects with business-critical deadlines, overseeing the entire process from production to delivery. Including creating email marketing campaigns / templates on very tight timelines, ensuring they were thoroughly tested across multiple email clients and browsers using Litmus.

July 2010 - May 2011

Front-end Developer @ British Maritime Technicians

I managed all 32 subsidiary company websites as well as the intranet site using their CMS. My responsibilities included handling queries, creating new areas, and microsites, and converting paper-based magazines to online formats. I also managed domain name registrations and renewals, and created optimized images and banners for web use.

May - July 2010

Contract Front-end Developer @ Orange

Converting Photoshop wireframes into W3C-compliant sites for the Help and Support section. Ensuring cross-browser compatibility was a critical aspect of the role, with thorough testing across Chrome, Safari, Internet Explorer 6, 7, 8, and Firefox.

Experience continued

March - May 2010

Contract Front-end Developer @ the group digital agency

I utilized XHTML, CSS, and Dreamweaver to develop web pages adhering to strict AAA W3C standards and Web Content Accessibility Guidelines. Ensuring cross-browser compatibility and meeting tight deadlines. I created online annual reports for prominent brands such as Barclays, Centrica, Aviva, Prudential, and Kingfisher.

Feb 2005 - Dec 2009

Front-end Developer @ Capita

I liaised with various clients to scope, develop, and maintain intranet projects and create microsites using Dreamweaver and XHTML. My role also involved preparing graphics for banners, icons, and buttons using Fireworks. Additionally, I took pleasure in independently conducting one-on-one training sessions for department heads.

July - Oct 2004

Front-end Developer @ Harvey Nichols

I supported various operating systems and configured Outlook emails with the Microsoft Exchange server. My responsibilities included maintaining point-of-sale systems, running checks on store POS servers, and managing applications like Hyperian, Mercatus, and Arthur for stock management. I assisted users with network drive mapping, new user setup, and general PC issues. Additionally, I performed remote maintenance and support, logged all calls using helpdesk software, and resolved issues or escalated them to the appropriate support team.

Oct 2003 - July 2004

Data Input Specialist@ EDF Energy

Skills included; Data entry, training staff, Word, Excel, working to deadlines, data analysis and information checks.

Hello

I am excited to learn about the opportunity to join your team as a Front-End Web Developer. With 20 years of experience in the field, I am confident that my skills and background align well with the requirements of this role.

Throughout my career, I have worked with a diverse range of companies, including FTSE 100 firms, startups, agencies, and in various contract roles. This breadth of experience has equipped me with a robust skill set and the ability to adapt quickly to different environments.

At BMJ, I was often the sole Front-End Developer responsible for managing multiple sites simultaneously. My role required me to attend several different sprint meetings and effectively manage daily context switching. One of my key accomplishments was the rebuild of the BMJ Learning site from HTML to React, learning the framework as I went. More recently my managers also selected me to help build a mobile app for OnExamination alongside the agency based in india. This task due to my organisational skills, ability to work at a fast pace, high ticket completion rate, and proven capacity to thrive under pressure. Despite initially having no experience in mobile app development or the Dart programming language, I successfully learned Dart, installed necessary packages, and quickly became proficient in building user interfaces for the app.

I have a strong background in ensuring cross-browser compatibility, meeting strict deadlines. My technical expertise includes HTML, CSS, JavaScript, various CMS platforms, version control systems like SVN and GitHub, AWS deployment, and GitHub Actions.

My academic foundation in web development has fostered a passion for continuous learning, allowing me to quickly acquire new skills and adapt to emerging technologies.

It has long been my ambition to contribute to a major global brand like yours. I am confident that, given the opportunity, my knowledge and skills will thrive in such an environment. I am eager to make a valuable contribution to your team and believe this is the perfect time in my career to embrace a new challenge.

My CV provides further details on my achievements and experience. I would welcome the opportunity to discuss how I can contribute to your company. Thank you for considering my application, and I look forward to the possibility of speaking with you soon.

Sincerely yours

Saguna Tailor
